

## Job Instruction

### 1. Masking the joint gaps

1.1. Mask the entire joints gaps between the individual bricks, save the mask as an alpha channel

1.2. Save the image as a PSD File

Note: Be as precise as possible and don't cut off corners!

2. Cut out each Brick and generate separate files

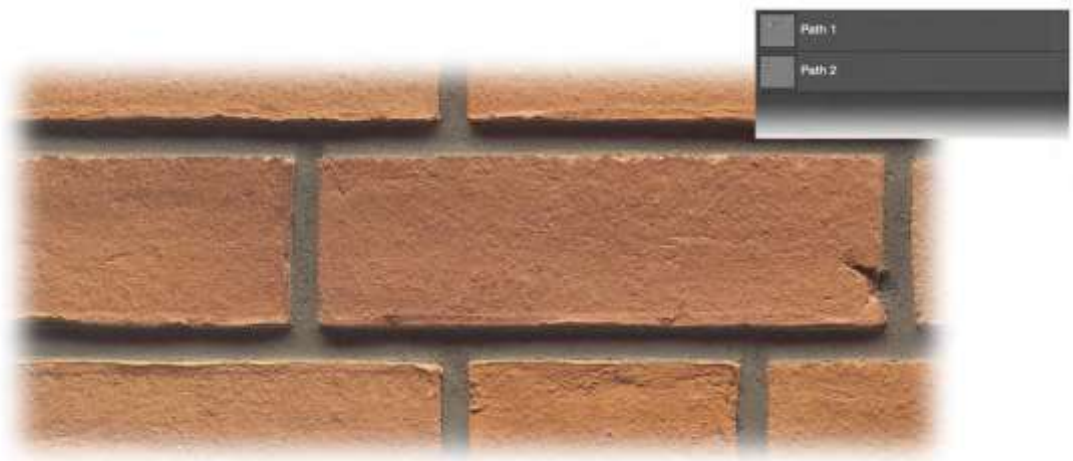

2.1. Cut out each Brick (without drop shadows) using the masking or path tool.

2.2. Save each clipping path in the original file.

2.3. Generate individual PSD files out of the cut out Bricks. Name the files in numerical order starting from 1 (e.g. „Stone\_1“, „Stone\_2“, etc.).

2.4. Send back the original file including all the clipping paths or alpha channels and the files of each Brick.

Note: Again, be as precise as possible and avoid cutting off corners or small details!
